INDEPENDENT AUDITORS’ REPORT

To the Board of Directors
The Kohlberg Foundation, Inc.

We have audited the accompanying financial statements of The Kohlberg Foundation, Inc., which comprise the statements of assets, liabilities and net assets – income tax basis as of December 31, 2020 and 2019, and the related statements of revenues, expenses and changes in net assets – income tax basis, functional expenses – income tax basis, and cash flows – income tax basis for the years then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with the income tax basis of accounting as described in Note 2; this includes determining that the income tax basis of accounting is an acceptable basis for the preparation of the financial statements in the circumstances. Management is also responsible for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor’s judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity’s preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity’s internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the assets, liabilities, and net assets of The Kohlberg Foundation, Inc. as of December 31, 2020 and 2019, and the results of its revenues, expenses and change in net assets for the years then ended in accordance with the income tax basis of accounting as described in Note 2.
Basis of Accounting

We draw attention to Note 2 of the financial statements which describes the basis of accounting. The financial statements are prepared on the income tax basis of accounting, which is a basis of accounting other than accounting principles generally accepted in the United States of America. Our opinion is not modified with respect to that matter.

THE KOHLBERG FOUNDATION, INC.
NOTES TO FINANCIAL STATEMENTS-INCOME TAX BASIS
DECEMBER 31, 2020 AND 2019
(THOUSANDS OF DOLLARS)

NOTE 1 — NATURE OF ACTIVITIES

The Kohlberg Foundation, Inc. (the “Foundation”) is a private family foundation. The Foundation's primary focus is to provide support for health and medical research, education, and the environment.

NOTE 2 — SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Accounting Basis
The Foundation's policy is to prepare its financial statements on the basis of accounting used for income tax reporting which is similar to the modified cash basis. Consequently, contributions are recognized when cash is received rather than when pledged or promised, and certain expenses and grants are recognized when cash is disbursed rather than when the obligation is incurred. The Foundation's financial statements are prepared in accordance with reporting formats consistent with guidance on reporting information regarding financial position and activities for not-for-profit organizations. Under that guidance, the Foundation is required to report information regarding its financial position and activities according to two classes of net assets: net assets with donor restrictions and net assets without donor restrictions.

Net Assets
The Foundation's net assets and revenues, gains, and losses are classified based on the existence or absence of donor-imposed stipulations. Accordingly, the net assets of the Foundation and changes therein are classified and reported as follows:

• Without donor restrictions – Net assets that are not subject to donor-imposed stipulations.

• With donor restrictions – Net assets subject to donor-imposed stipulations, including stipulations that will be met either by actions of the Foundation or the passage of time, stipulations that they be held in perpetuity by the Foundation, and unappropriated endowment earnings. The Foundation has no net assets with donor restrictions.

Investments
The Foundation follows the Financial Accounting Standards Board (“FASB”) guidance on fair value, which, among other things, defines fair value, establishes a hierarchal framework for measuring fair value, and expands disclosure about fair value measurements. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value hierarchy is organized into three levels based upon the assumptions (referred to as "inputs") used in pricing the asset or liability, as follows:

Level 1: Inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the reporting entity has the ability to access at the measurement date.

Level 2: Inputs are other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly, with fair value being determined through the use of models or other valuation methodologies.

Level 3: Inputs are unobservable inputs for the asset or liability and are used to the extent that observable inputs do not exist. Level 3 inputs require significant management judgment and estimation. Factors considered include the purchase cost, prices of recent private placements of the same issuer, liquidity of the investment, changes in financial condition of the issuer, and valuations of similar companies.
THE KOHLBERG FOUNDATION, INC.  
NOTES TO FINANCIAL STATEMENTS-INCOME TAX BASIS  
DECEMBER 31, 2020 AND 2019  
(THOUSANDS OF DOLLARS)  

NOTE 2 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)  

Investments (Continued)  
The Foundation values all of its investments using Level 1 inputs and the practical expedient. Investments are presented at fair value as determined by methodologies relevant to each asset class with any related gain or loss reported in the statements of revenues, expenses and changes in net assets – income tax basis. Equities and fixed income securities listed or traded on a securities exchange are valued at the last sale price on the primary exchange where the security is traded. Money market accounts are valued as determined by the bank or money market manager. 

Marketable securities held by a custodian, either in the Foundation’s name or held for the Foundation’s account in a street name, are valued by the custodian using a valuation methodology similar to above. Marketable securities held by mutual funds, pooled investment funds, and hedge funds are valued by the fund manager using a valuation methodology similar to the above. Alternative investments, including private equity interests, are valued using the most recent valuation available by the respective external fund manager. The Foundation reviews and evaluates the values provided for alternative investments by the general partner or fund manager and assesses the valuation methods and assumptions used in determining the fair value of the investments. The methods described may produce a fair value calculation that may not be indicative of net realizable value or reflective of future values. Furthermore, while the Foundation believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date. The Foundation reports investment income and gains and losses as increases or decreases in net assets without donor restrictions in the statements of revenues, expenses and changes in net assets – income tax basis unless a donor or law restricts their use. 

The asset allocation of the Foundation’s portfolio is intended to provide exposure to a diverse set of markets. These markets are subject to various risks such as interest rate, market, sovereign, and credit. The Foundation anticipates that the value of its investments may, from time to time, fluctuate as a result of these risks and anticipates that the structured diversification will mitigate market risks. The Foundation believes the carrying amount of these financial instruments is a reasonable estimate of fair value. 

The accounting policy concerning investment valuations relies on data from fund managers that cannot be substantiated by third parties and it is considered to have the largest potential for significant financial impact. Valuations for investments, principally alternative investments, are subjective and require judgment regarding significant matters such as the comparability of similar investments, liquidity, interest rates, and the determination of external events adequate to quantify changes in value. Changes in assumptions could have a significant effect on the fair value of these instruments. 

Use of Estimates  
The preparation of financial statements requires management to make estimates and assumptions that affect certain reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. The Foundation regularly assesses these estimates and, while actual results may differ from these estimates, management believes that material changes will not occur in the near term. 

Uncertainty in Income Taxes  
The Foundation evaluates all significant tax positions as required by accounting principles generally accepted in the United States of America. As of December 31, 2020, the Foundation does not believe that it has taken any tax positions that would require recording of any additional tax liability nor does it believe that there are any unrealized tax benefits that would either increase or decrease within the next year.

NOTE 2 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Functional Expenses
The costs of providing various programs and other activities have been summarized on a functional basis in the statements of functional expenses — income tax basis. The financial statements report certain categories of expenses that are attributed to more than one program or supporting function. Therefore, expenses require allocation on a reasonable basis that is consistently applied. The expenses that are allocated include insurance, salaries and wages, benefits, payroll taxes, professional services, office expenses, information technology, and other, which are allocated on the basis of estimates of time and effort.

Cash Equivalents
For purposes of the statements of cash flows — income tax basis, the Foundation considers all highly liquid investments with maturities of three months or less when acquired to be cash equivalents.

Recently Adopted Accounting Standards
FASB Accounting Standards Update (‘ASU’) 2019-04, “Codification Improvements to Topic 326, Financial Instruments—Credit Losses, Topic 815, Derivatives and Hedging, and Topic 825, Financial Instruments”, was adopted for the year ended December 31, 2020. ASU 2019-04 aims to clarify certain aspects of accounting for credit losses, hedging activities, and financial instruments. The adoption of this standard had no significant impact on the financial statements.

NOTE 3 – LIQUIDITY AND AVAILABILITY OF RESOURCES FOR GENERAL EXPENDITURES

The Foundation regularly monitors liquidity required to meet its operating needs, while also striving to maximize the investment of its available funds. The Foundation has various sources of liquidity at its disposal, including cash and cash equivalents and marketable equity securities. For purposes of analyzing resources available to meet general expenditures over a 12-month period, the Foundation considers all expenditures related to its ongoing activities as well as services undertaken to support those activities to be general expenditures. In addition to financial assets available to meet general expenditures over the next 12 months, the Foundation anticipates collecting sufficient revenue to cover expenditures through investment activities. Refer to the statements of cash flows - income tax basis, which identifies the sources and uses of the Foundation’s cash and shows negative cash generated by operations for the years ended December 31, 2020 and 2019.

(a) Hedge Fund Investments. Hedge fund strategies include: relative value and event driven strategies. Some funds may invest in side pockets, which are a separate share class and are not available for redemption until the investment is liquidated by the manager.

(b) Non-Marketable Investment Strategies. Private equity strategies include: leveraged buyout, growth equity, venture capital, real estate, and distressed debt. Non-marketable funds do not permit redemptions; capital is returned to investors at the discretion of the investment manager and in accordance with limited partnership terms. Interim distributions of interest and dividends can be made; however, capital and realized gains are generally distributed when underlying investments are liquidated. Funds are able to recall distributions. It is expected that the majority of the non-marketable investments will be liquidated over the next ten years.
THE KOHLBERG FOUNDATION, INC.
NOTES TO FINANCIAL STATEMENTS-INCOME TAX BASIS
DECEMBER 31, 2020 AND 2019
(THOUSANDS OF DOLLARS)

NOTE 4 – INVESTMENTS (Continued)

Quoted market values are used to value investments other than index funds which are carried based on
fair values provided by fund managers.

Limited partnership/limited liability companies/other investment vehicles use market values established by
their managers where quoted market values are not available. The investment’s basis of income used for
income tax reporting has been used for certain investments where market values were not available.
Realized gains or losses are determined by comparison of cost, determined on a first-in, first-out basis, to
proceeds from sales. Investment transactions are recorded in the accounts on the trade date. The cost of
investment securities represents the amount paid for securities purchased, adjusted for accretion of
discount or amortization of premium on bonds purchased. Investment income related to each investment
vehicle is included within the income and appreciation on that investment in the statements of revenues,
expenditures and changes in net assets – income tax basis.

Interest and dividend income for the years ended December 31, 2020 and 2019 was $3,874 and $5,503,
respectively. Total investment gains for the years ended December 31, 2020 and 2019 were $14,174 and
$17,039, respectively. Investment fee expenses, which are included with investment returns, were $394
in 2020 and $545 in 2019.

The primary emphasis of the investment policy is to safeguard and preserve the principal of the
investments after inflation. Accordingly, the investment process seeks to achieve a total real rate of
return, including investment income as well as capital appreciation, which exceeds the annual distribution
with acceptable levels of risk. Portfolio assets are invested in a well-diversified asset mix, which includes
equity and debt securities, that is intended to result in a consistent inflation-protected rate of return that
has sufficient liquidity to make an annual distribution in accordance with the spending policy (currently
5.5%), while growing the funds. Therefore, the Foundation’s goal is for its investment assets, over time,
to produce a long-term real rate of return, after inflation and net of fees, of approximately 6-7% annually.

Actual returns in any given year may vary. Investment risk is measured in terms of the total investment
portfolio, investment assets and allocation between asset classes and strategies are managed to not
expose the fund to unacceptable levels of risk. In light of current market conditions, the Foundation
annually reassesses its investment and spending policies.

NOTE 5 – TAXES

The Foundation is exempt from federal income taxes and qualifies as a private foundation under Section
501(c)(3) of the Internal Revenue Code. The Foundation is subject to a federal excise tax of one or two
percent of net investment income, as defined by the Internal Revenue Code. If the average payout ratio of
the past five years plus one percent of net investment income current year, as defined for tax purposes, is
less than the current year’s charitable distributions, federal excise tax is payable at one percent of net
investment income. The Foundation paid federal excise tax of one percent on its investment income, as
defined for tax purposes, for each of the years ended December 31, 2020 and 2019. The Foundation is
also subject to the unrelated business income tax (“UBIT”) on certain income from pass-through
investments.

</table>

Payments on authorized, but unpaid grants may be accelerated upon mutual agreement between the Foundation and the grantees. Additionally, the grants are conditional based on the grantees’ meeting certain performance criteria.

NOTE 7 – RETIREMENT PLANS

The Foundation participates in two defined contribution retirement plans. The plans cover substantially all employees. The salary deferral plan allows employees to defer a portion of their salary into the plan. The plan contains a matching contribution provision where the Foundation may match the participants’ contributions up to two percent of compensation. The money purchase plan requires the Foundation to contribute eight percent of annual eligible compensation, as defined, and is integrated with Social Security. Total pension expense, under both plans, for the years ended December 31, 2020 and 2019 was $59 and $57, respectively.

NOTE 8 – RELATED PARTIES

The Foundation shares personnel with other related not-for-profit entities. The associated costs have not been allocated to the other entities and are $146 and $144 for the years ended December 31, 2020 and 2019, respectively.

NOTE 9 – CONCENTRATIONS OF CREDIT RISK

The Foundation maintains its cash in bank deposit accounts at high-credit, quality financial institutions. Efforts are made to keep balances within federally insured limits; however, due to timing differences the balances, at times, may exceed federally insured limits. At December 31, 2020, the Foundation’s uninsured cash and cash equivalents balance totaled $7,513. Additionally, the Foundation maintains money market accounts at major investment firms.

NOTE 10 – COVID-19 PANDEMIC

On March 11, 2020, the World Health Organization ("WHO") recognized COVID-19 as a global pandemic, prompting many national, regional, and local governments to implement preventative or protective measures, such as travel and business restrictions, temporary store closures, and wide-sweeping quarantines and stay-at-home orders. As a result, COVID-19 and the related restrictive measures have had a significant adverse impact upon many sectors of the economy, including the industries in which the Foundation operates.

NOTE 11 – SUBSEQUENT EVENTS
